

Amanda Mah (IHRP-CP)

HR Business Analyst (Data Analytics) and HRIS

Singaporean · amandamah1@hotmail.com · 92950251

HR Analytics professional with a Computing background and 10+ years spanning people analytics, HRIS implementation and HR technology. Skilled in building data infrastructure (Snowflake, Power BI), automating workflows (Python, VBA, RPA) and translating HR business problems into actionable insights. Experienced across the full analytics stack — from data pipeline design and dashboard development to AI strategy and capability building. Holds IHRP-CP certification and hands-on exposure to Workday, SAP SuccessFactors and SAP HCM.

WORK EXPERIENCE

Manager, Human Resource (HR Analytics)

Land Transport Authority

November 2024 to Present

- Built and architected HR's first centralised data platform on Snowflake, developing pipelines, transformation logic, and governance from the ground up. Delivered a scalable workforce analytics framework integrating Power BI, replacing fragmented Tableau reporting with a unified ecosystem serving 150–200 users across HR and management.
- Co-authored the 3-year HR AI and digitalisation roadmap (2026–2028) and mapped the organisation's AI HR Maturity Model — assessed digital HR capabilities, identified gaps and recommended strategic initiatives to accelerate analytics adoption.
- Applied machine learning and NLP techniques using Scikit-learn to auto-classify and tag beta HR chatbot enquiries by topic, improving response accuracy and chatbot training data.
- Automated HR workflows using Python and VBA, increasing efficiency in headcount reporting and management slide generation.
- Built a centralised data access governance process from scratch — designed the form intake system and operationalised end-to-end handling of 30–50 requests/year across multiple teams company-wide.
- Designed and delivered HR's data capability programme — built the full learning journey from Excel to Power BI to AI, identified and trained Digital Champions, and mentored HR teams to drive adoption of analytics practices and a culture of continuous improvement.

HR Business Analyst (Data Analytics)

Toll Logistics (Asia) Limited

January 2022 to November 2024

- Formulated Power BI dashboards providing people leaders with analysis of people data and metrics, surfacing meaningful trends and actionable insights.
- Supported workforce planning activities and annual performance management cycles.
- Facilitated regional data management exercises to standardise current workflow and data.
- Leveraged Python, Power Query and Power Automate to streamline and automate end-to-end data delivery, from data infrastructure to visualisation.
- Applied Python to facilitate employee engagement analysis, grouping text comments into key themes for leadership review.
- Enhanced recognition programme support, contributing to increased employee satisfaction scores above benchmarked levels.

HRIS Associate

Mizuho Bank, Ltd

December 2018 to January 2022

HR Analytics

- Involved in People Analytics projects to bring insights on employee turnover and employee churn model.
- Turn data to actionable insights, drive decision making and improve HR metrics for Policy reviews

HRIS / HRIT Business Analyst

- Managed SAP Successfactor system (EC, PMS, LMS, SAP JAM) from Head Office. Headed Regional enhancements, security module and issues for branches across Asia and Oceania.
- Improved and created new features on HR systems (such as IBM Brassrings, local HRIS) by streamlining interface data, including downstream impacted systems such as Whispir for BCP (Business Continuity Planning) team, which was widely used during Covid-19

Process Automation and Re-Engineering

- Automated processes by implementing unattended robot through RPA using uiPath. Effectively reducing processing time from 3 hours daily to none - eliminating manual intervention
- Launched and performed HR process re-engineering when moving physical pfiles to digital pfiles

Business Analyst*Government Technology Agency of Singapore**October 2017 to October 2018*
